## RapidRoll® 3000 Delivers Improved Reliability and Security for Fortune 500 Logistics Provider

C. H. Robinson Worldwide is one of North America's largest third party (3PL) logistics companies with operations in the United States, Canada, Mexico, South America, Europe and Asia. The company specializes in truck, rail, ocean and air logistics serving over 18,000 customers throughout its 176 worldwide offices.

Chicago, Illinois is home to two C. H. Robinson branches, one of which relocated to a new building on the north side of the city in February 2005. This new facility includes an 82,000 square foot parking garage located beneath the building. Hundreds of vehicles, including automobiles and bicycles are driven in and out of the structure each working day.

Their previous building had two wooden sectional doors at the entrance and exit of the parking garage. These doors were unable to withstand the high-cycle usage required during prime operating hours and were constantly in need of repair. The heavy sectional doors were also slow to open and close presenting security concerns. C. H. Robinson looked to another global leader, Albany Door Systems, for a solution at their new location.

C. H. Robinson chose Albany Door Systems' innovative RapidRoll® 3000 High Performance Industrial Door. The RapidRoll® 3000's patented DiscDrive winding system enables the door to withstand the rigors of high-cycle usage greatly minimizing costly interruptions. The company installed two RapidRoll® 3000s, one each at the entrance and exit of their underground parking garage.

A card reader and gate were configured to operate in unison with the entry door. Upon activation of the gate, the RapidRoll® 3000 quickly opens as the gate arm closes permitting only one vehicle to enter the garage at a time. The exit door is activated when a vehicle passes over a floor loop inside the garage. Albany's exclusive Contactless Safety Edge® traveling photocell prevents the doors from contacting vehicles as they pass underneath. C. H. Robinson's parking garage is notably more safe and secure thanks to the speedy and durable RapidRoll® 3000 High Performance Industrial Door from Albany Door Systems.
