

EXCALIBUR™ SOLID ALUMINUM THRESHOLD

For industrial overhead and entry door applications where maximum strength and durability are required, the patented design stands 1/2" tall and is built with 6061-T6 aluminum to withstand extreme weight and excessive traffic conditions.

Two-way fastening/seal system won't shift, buckle or leak, while top V-groove design for skid proof protection and improved tire traction on loading docks and incline ramps.

The 1/2" diameter wire access port makes it easy for sensor and security installations. Kit comes complete with pre-drilled countersink holes, 3/8" anchors and sealant.

Excalibur™ heavy duty aluminum thresholds are made of 6061-T6 aluminum and come in six standard lengths up to 20'4" with either 4" or 6" widths. Sold on its own with pre-drilled counter sink holes, 3/8" anchors and adhesive.
